

Alexander Kozmanishvili

Senior Product Experience Designer

Lyon, France | +33 7 44 41 77 76 | kozmanishvili@gmail.com | sk01.world

Senior Product Experience Designer with extensive experience delivering complex web and mobile products across Product, Design and Engineering teams. Expertise in design systems, accessibility (WCAG 2.1) and AI-powered user journeys, including conversational UX and AI-assisted prototyping.

Proven contributor to PX guilds, mentoring and design evangelisation initiatives that strengthen product quality and collaboration. Fluent in English with intermediate French proficiency (B1–B2).

PROFESSIONAL EXPERIENCE

Senior Product Experience Designer | Heca Unipersonale (Remote) | Nov 2023 – Present

- Owned end-to-end design of a 0-to-1 employee-facing platform (web + mobile): discovery, problem framing, prototyping, usability research, delivery — embedded in a cross-functional PM/Engineering squad
- Designed AI-powered conversational triage flows (Claude API integration) embedded directly in user journeys — reduced misrouting by 35%; treated AI as a default design consideration, not a specialty
- Led accessibility strategy: WCAG 2.1 audits, remediation backlog prioritisation with engineering, primary accessibility design partner across the product
- Built design system from scratch (components, interaction specs, accessibility guidelines); mentored 2 junior designers — cut handoff time 50%, post-launch bugs 60%

Lead Product Designer | Symmetra Digital, Tbilisi | Feb 2020 – Jul 2023

- Designed complex consumer-facing and admin-facing products for 100K+ users across web and native mobile — portals, claims flows, governance dashboards, preventive care tracking; embedded in product trios discovery-to-delivery
- Used qualitative & quantitative research (contextual inquiry, usability testing, analytics) to drive decisions: +22% activation, –40% support tickets, 50% fewer errors
- Scaled design system across 4 products: WCAG 2.1-compliant component libraries, interaction specs, documentation; mentored 3 designers with weekly critiques and career coaching
- Introduced JTBD framework, led stakeholder workshops, published internal design guidelines; drove org-wide shift to outcome-driven development

Product Designer | FollowFox, Tbilisi | Apr 2017 – Jan 2020

- Designed mobile + web health journeys (scheduling, records, symptom tracking); contextual inquiry with users and staff; lean UX cycles with rapid prototyping and MVP validation in agile teams

Web & Brand Designer | McCann Erickson, Tbilisi | Jul 2015 – Apr 2017

- Web design and art direction for healthcare, retail, banking clients — balanced brand identity with usability

SKILLS & TOOLS

Product Design: End-to-end UX/UI • Complex & admin-facing domains • Mobile + web • 0-to-1 & scaling • Interaction design • Usability

Accessibility: WCAG 2.1 • Accessibility audits • Remediation planning • Inclusive design patterns

AI in Design: Designing AI-assisted & conversational flows • Prototyping with AI • Claude API • Midjourney • AI-driven user journeys

Research & Data: Qualitative & quantitative research • Contextual inquiry • Usability testing • Analytics • JTBD

Design Systems: Component libraries • Interaction specs • Accessibility guidelines • Multi-product scaling

Collaboration: Cross-functional product trios • Agile delivery • Design guild contribution • Stakeholder workshops • Mentoring

Tools: Figma (advanced: variants, auto-layout, prototyping, design systems) • Framer • HTML/CSS/JS

Languages: English (fluent) • French (B1-B2, intermediate) • Georgian (native)

EDUCATION & CERTIFICATIONS

Bachelor, Visual Communications & HCI | Tbilisi State Academy of Art, 2011

French ENIC-NARIC Recognition: Level 6 — EQF Level 6 (equivalent to French Bachelor's degree)

IDF — Methods to Design Better Products & Services (2024) | IDF — Mobile Interface Design (2023)
